

# Sanjyot Bhagat

Full-Stack Software Engineer (.NET + React)

Pune | sanjyotbhagat97@gmail.com | +91 8408098012 | LinkedIn

## Summary

---

Full-Stack Software Engineer with 3+ years of experience building scalable B2B and B2C e-commerce applications using C#, .NET and React.js. Skilled in designing RESTful APIs, optimizing application performance, and delivering SEO-friendly, high-performance web solutions. Experienced in clean architecture, API-first design, and Agile development practices.

## Skills

---

- **Backend & APIs:** C#, ASP.NET Core, Web API, REST APIs, LINQ
- **Frontend:** React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS
- **Databases:** MS SQL Server, SQL Queries, Stored Procedures
- **ORM & Data Access:** Entity Framework Core
- **Tools:** Visual Studio, VS Code, Git, GitHub, Postman, Swagger, SSMS
- **Cloud:** Microsoft Azure
- **Architecture & Practices:** SOLID Principles, Clean Architecture, Microservices, Agile, SEO Optimization

## Professional Experience

---

**Associate Software Engineer – Amla Commerce, Nagpur, MH**

**July 2023 – Jan 2026**

(E-commerce SaaS Platform)

- **Project:** Znode Ecommerce Product – a B2B and B2C e-commerce platform for managing complex e-commerce workflows.
- Developed and maintained scalable backend systems using ASP.NET MVC and ASP.NET Core.
- Migrated backend and admin modules from .NET Framework to ASP.NET Core, reducing API response time by **30%** and improving maintainability.
- Rebuilt the customer-facing webstore using React.js and Next.js, improving application performance while delivering SEO-friendly, mobile-first user experiences.
- Built a high-performance Typeahead Search feature, increasing user engagement by **15%**.
- Designed and implemented RESTful APIs following SOLID principles with dependency injection and reusable service layers.
- Implemented a Backend-for-Frontend (BFF) layer to enhance API security, standardize responses, and simplify frontend data consumption.
- Adopted an API-first design approach using Stoplight to improve API clarity and frontend-backend collaboration.
- Optimized database performance using Entity Framework Core and SQL Server.
- Implemented CI/CD pipelines using GitHub Actions to automate build, testing, and deployment workflows.

**Trainee Software Developer – Infomatics Services Pvt. Ltd., Mumbai, MH**

**May 2022 – Nov 2022**

(BFSI Solutions)

- Developed role-based financial applications using C# and SQL Server.
- Built transaction modules with validations and optimized backend services using SQL queries and stored procedures.
- Followed clean coding practices and contributed to reusable backend components.

## Education

---

**Bachelor of Engineering (Information Technology)**

2019

Priyadarshini College of Engineering, Nagpur
